

## COMPLIANT, SCALABLE EMAIL ARCHIVING

### In-Portal Email Archiving from VIPRE

You've already chosen VIPRE for your email protection service – now you can add cloud-based email archiving to your bundle and manage it all in the VIPRE Email Security administration portal, quickly and easily.

VIPRE Email Archiving is easy to use for administrators, users and compliance officers. All email is securely and reliably captured, retained, and available for later search and retrieval at any time. Our advanced search allows complex queries using a complete set of include/exclude criteria, across all email attributes. You can perform multiple searches with different search criteria and view results in separate tabs.

### Access

Only users with the role of compliance officer can access your organisation's archive, ensuring complete separation of email administration from legal review. However, you can selectively extend the benefits of email archiving to all your users enabling them to access and search their *own* email archive. The administrator can enable or disable a user's access to personal archives at any time and users are unable to delete emails from their archive.

### Overview

Users can access stored messages from anywhere, on any device using a web browser.

Simpler management and maintenance with no hardware updates, patches or fixes.

Cloud-based architecture means you are not reliant on any one piece of hardware.

Simple email retrieval for end users and compliance officers.

Unlimited, off-site storage with no time restriction on how long you keep it there.

No one can amend an email stored in our cloud archive, meaning your emails are 100% tamperproof and compliant.

### KEY BENEFITS

- ✓ Familiar VIPRE administration portal
- ✓ Easy to use interface with quick and simple installation
- ✓ Fully integrated and platform independent - Outlook, Exchange, Lotus Notes, Google Apps and compatible with Office 365
- ✓ Tamperproof archiving system captures emails at the gateway
- ✓ Local datacentres and local support
- ✓ Archives internal and external, incoming and outgoing emails
- ✓ Infinitely scalable for your growing business
- ✓ Predictable costs with a per user pricing model

Every action performed on a message, whether it is opened, downloaded, re-delivered or tagged is recorded in the compliance log for the message giving you a full audit trail.

Easy to add to your existing VIPRE Email Security Essentials, Cloud or ATP subscription.
