VIPRE SECURITY AWARENESS TRAINING
Essentials, Advanced, Enterprise

VIPRE®

REDUCE BUSINESS RISK, AND INCREASE SECURITY AND COMPLIANCE FOR EVERY ORGANISATION

VIPRE Security Awareness Training (SAT) is an easy to use, cloud-based learning solution that builds practical, cost-effective security awareness for an organisation's employees.

The content featured in each VIPRE SAT course has been developed to teach users to keep security top of mind in everything they do and to empower them to be the best defence of their company's IT infrastructure. Choose from Essentials, Advanced or Enterprise packages to best suit your organisation's needs.

Training Packages Include:

SAT Essentials

An out-of-the-box learning programme that allows resource-conscious organisations to deliver regular, highly effective security awareness training with little admin effort.

- Pre-set schedule consisting of quarterly courses, reinforcing 'micro-learning' courses and bi-monthly phishing simulations delivered to all users
- Minimal admin input allows small businesses to focus on day-to-day IT operations
- Value pricing for the small business owner

SAT Advanced

A comprehensive package of automated security awareness courseware combined with flexible access to phishing, vishing, and smishing simulations.

- Pre-set schedule consisting of bi-monthly courses, reinforcing 'micro-learning' courses and monthly phishing simulations delivered to all users
- Scheduled campaigns, scheduled randomisation, and auto-enrollment in reinforcement training
- Customisable voicemail and mobile phone training to combat vishing and smishing attempts

SAT Enterprise

A complete learning management system that delivers a full course library and the ability to customise courseware and simulations.

- Pre-packaged courseware with default templates for quick delivery
- Tailor training for specific departments or groups
- Full catalogue of general courses including security, privacy, ethics, compliance and access to micro-focused courseware for diverse enterprises
- Customisable voicemail and mobile phone training to combat vishing and smishing attempts
- Customise training paths, course scheduling, and phish simulation scheduling for complete control over the learning experience

Why Choose VIPRE SAT?

Superior Content - engaging, enterprise quality content for organisations of all sizes

Security Awareness in a Box - perfect balance of phishing and behavioural remediation to identify at-risk employees through on-going simulations and continual reinforcement of best practices

Simple Reporting - automated reports provide quick insight into how well employees are doing to reduce risk and build a cyber-secure workplace

Automated Deployment - our automated course deployment model delivers maximum impact with minimal administrative effort

Integrated Phishing Sims - automated, drip style phishing simulation campaigns included in all packages and monthly reports on how employees are improving help demonstrate ROI

Effective and Concise Delivery - easily consumable, time-conscious and proven topics enable an employee base to develop core security awareness practices in a minimal amount of time
