

FASTER, SAFER, MORE SECURE

VIPRE Web Security powered by Zscaler gives you control over what employees do online and protects your organisation from web-based threats, all while eliminating the cost and complexity of the traditional on-prem web gateway. Using our globally distributed cloud, bring the Internet gateway closer to your users for a faster experience, and as a cloud-based solution, it's easy to scale this enterprise-grade protection to all offices or users, regardless of location.

An easy-to-use central management console lets you define web usage policies that can be applied to your entire organisation, specific teams or individuals, regardless of where your users are located. Granular policy enforcement lets you manage what each employee can access online and real-time reporting gives you detailed insights into your organisation's web activity.

Our inline antivirus and anti-spyware scanning keeps your network safe from web-based viruses, spyware and other types of malware by inspecting all incoming and outgoing traffic for malicious content. With advanced features such as social networking controls, data loss prevention and browser control, you can tailor the service to suit your exact requirements.

VIPRE Web Security

- Remove security complexity with our cloud-based, security stack as a service.
- Protect your organisation from web-based threats with true Zero Trust Network Access (ZTNA)..
- Enjoy flexibility from a solution that grows with you.
- Take control of internet browsing.
- Enforce web usage policies and enterprise-grade protection to all users regardless of their location.
- Take back control and management of 'Shadow IT'.
- Improve operational resilience with multi-site and roaming user support.
- Standard cloud sandboxing included in all packages.
- Roll out to all users using the lightweight Zscaler Client Connector.
- Know you are in safe hands with VIPRE - one of Zscaler's longest-standing partners.

WORLD CLASS WEB SECURITY AND FILTERING

Gartner Magic Quadrant Leading Service

This service has held the leading position in the Magic Quadrant for Secure Web Gateways for over 10 years and our team have been deploying, supporting and managing it for even longer.

Full Inline Content Inspection

Inspects each outbound and inbound byte, even hard-to-inspect SSL traffic, with only microsecond latency.

Real-time Threat Correlation

Dynamically compute the risk of every web page object or the web page itself using the content and domain analysis.

Simple, Scaleable Packages

Build the package that suits your organisation now, but know you have the option to add more protection as you need it.

Real-time, actionable analytics and reporting

VIPRE Web Security makes threat investigation seamless and immediate. Within seconds you can drill down to a per-user overview to understand events and correlate threats. Isolate botnet-compromised devices with a few clicks, or leverage application visibility to validate if and where non-IT-compliant apps are used.

BUILD THE SOLUTION THAT SUITS YOUR ORGANISATION

Choose from our ready made business bundles or put together your own package from the options below.

ZSCALER INTERNET ACCESS (ZIA)	PROFESSIONAL	BUSINESS	TRANSFORMATION
CLOUD SECURITY PLATFORM			
Data Centres Global access, high availability, with latency SLAs	✓	✓	✓
Traffic Forwarding GRE tunnel, IPsec, proxy chaining, PAC file, or Zscaler Client Connector	✓	✓	✓
Authentication SAML, secure LDAP, Kerberos, hosted	✓	✓	✓
Real-Time Cloud Security Updates Receive full cloud threat sharing (cloud effect), unique security updates (over 175K+/day) and 60+ security feeds	✓	✓	✓
Real-Time Reporting and Logging Report on web transactions anywhere in seconds, select geography of choice for all log storage (US or EU)	✓	✓	✓
SSL Inspection Full inline threat inspection of all SSL traffic with SLA. Granular policy control for content exclusion	add-on	✓	✓
Nanolog™ Streaming Service Transmit logs from all users and locations to an on-premises SIEM in real time	add-on	✓	✓

CLOUD SECURITY SERVICES			
Cyber Threat Prevention			
Inline Antivirus and Antispyware Signature based antimalware and full inbound/outbound file inspection	✓	✓	✓
Reputation-Based Threat Protection Stop known botnets, command-and-control communications, and phishing	✓	✓	✓
Mobile Application Reporting & Control Visibility, granular policy control, and threat protection for mobile devices on or off the corporate network		✓	✓
Advanced Threat Protection PageRisk and advanced threat web signatures for protection from malware, callbacks, cross-site scripting, cookie stealing, and anonymisers	add-on	✓	✓
Standard Cloud Sandbox Zero-day protection for .exe and .dll files from unknown and suspicious sites	✓	✓	✓
Advanced Cloud Sandbox with Quarantine Zero-day protection for all file types from all sites; ability to hold file delivery until confirmed sandbox clean; advanced reporting	add-on	add-on	✓
Cloud Browser Isolation Eliminate the risk of active web content and prevent data loss	add-on	add-on	✓
Cloud Application Visibility Discover and monitor web app access (such as streaming, social, email)	✓	✓	✓

ZSCALER INTERNET ACCESS (ZIA)	PROFESSIONAL	BUSINESS	TRANSFORMATION
CLOUD SECURITY SERVICES			
Data Protection			
Cloud Application Control Gain granular control over web app access (such as streaming, social, email)		✓	✓
Standard Cloud Data Loss Prevention Identify confidential data loss with inline scanning across PCI, PII and 2 custom dictionaries. Alerting only.		✓	✓
Advanced Cloud Data Loss Prevention Identify and prevent confidential data loss with inline scanning across all dictionaries	add-on	add-on	add-on
DLP Exact Data Match Fingerprint structured data to eliminate DLP false positives; Add-on 1 million cells per 100 seats	add-on	add-on	add-on
Essentials Out-of-band CASB Prevent Data exposure and ensure SaaS app compliance for 1 sanctioned app (excluding email). No historical scan.		✓	✓
Standard Out-of-band CASB Prevent data exposure and ensure SaaS app compliance for 1 sanctioned app (excluding email). Scan 10TB of historical data repositories.			✓
Advanced Out-of-band CASB Prevent data exposure and ensure SaaS app compliance for 1 sanctioned app or all apps (per choice). Scan 10TB of historical data repositories.	add-on	add-on	add-on
Cloud Security Posture Management Identify and remediate misconfigurations and assure compliance for IaaS and PaaS applications hosted on public cloud infrastructure	add-on	add-on	add-on
SaaS Security Posture Management Identify and remediate misconfigurations and assure compliance for SaaS applications, including M365.	add-on	add-on	add-on
ADDITIONAL SERVICES			
24/7 VIPRE Support	✓	✓	✓
Standard Zscaler Digital Experience (ZDX) Monitor and isolate user experience issues with complete end-to-end visibility for 3 apps		✓	✓
Enterprise License An Enterprise License Agreement (ELA) is available for customers with 5,000+ seats. Includes all available add-on services (except Cloud Browser Isolation and CSPM for IaaS and PaaS)
