

VIPRE Complete Defence

Multi-layered security defence that protects your entire organisation.

IN THE LAST DECADE, it's estimated that 27% of all Fortune 500 companies have experienced a data breach. These breaches have varied in size and method, with cybercriminals growing increasingly organised and sophisticated. Hacking groups now possess the tools capable of penetrating industries once thought to be invulnerable. To defend from the next generation of cyber

attacks, organisations must solve these security challenges with a multi-layered approach: using protection not only at the perimeter, but also from within the network.

That's why VIPRE Security has put together VIPRE Complete Defence, an all-in-one solution unifying industry best practices in a single, easy-to-purchase, deploy, and support security suite.

COMPLETE DEFENCE SERVICES

Endpoint Security Cloud

Best-in-class endpoint protection—powered by machine learning and real-time behavioural analysis—to stop viruses and ransomware in their tracks.

Web Access Control

Content filtering restricts access to resource-wasting websites and inappropriate media with granular settings for users and groups.

Encrypt.team

Cloud-hosted business-class VPN and ZTNA solution to ensure your organisation's remote workforce stays secure whether working from home or on-the-go.

Email Security Advanced Threat Protection

Safeguards businesses against attacks perpetrated through email, the most

common threat vector. Defends users against the newest, most sophisticated strains of malware, weaponised attachments, and phishing techniques that evade traditional detection.

Email Encryption

Send email safely, and without risk of snooping, to any recipient with full end-to-end email encryption.

Security Awareness Training

Education to enhance your employees' security posture when faced with evolving cyberthreats, 85% of which result from phishing and business e-mail compromise.

SafeSend DLP

Prevent misaddressed emails and reduce user error by scanning and confirming external recipients and email attachments in Microsoft Outlook.

VIPRE IN NUMBERS

20+

years of malware protection and cybersecurity

6M+

endpoints protected and 12M+ mailboxes protected

100k

customers and more than 3000 active channel partners

KEY BUSINESS BENEFITS

- ✓ Slash device and employee downtime due to ransomware and phishing attacks on servers and workstations
- ✓ Build a smarter, safer workforce prepared to recognise cyberattacks
- ✓ Protect sensitive data from prying eyes while employees work remotely
- ✓ Enforce acceptable-use policies to reduce inefficiencies, complaints, and legal liabilities
- ✓ Reduce business-threatening downtime due to malware, phishing, and spam attacks via email
- ✓ Protect your organisation's sensitive data by encrypting, scanning and validating email recipients
- ✓ As your company grows, managing a multitude of endpoint security solutions can become daunting—simplify your solution and provide truly effective protection with VIPRE Complete Defence.

As your company grows, managing a multitude of security solutions can become daunting—simplify your solution and provide truly effective protection with **VIPRE Complete Defence**.

“ANYONE FAMILIAR WITH THAT TYPE OF VIRUS UNDERSTANDS THE POTENTIAL DAMAGE IT CAN CAUSE TO AN ORGANISATION. WHEN OUR EMPLOYEE DOUBLE-CLICKED ON THE CRYPTOLOCKER FILE, VIPRE VAPORISED IT INSTANTLY.”

ABOUT VIPRE

VIPRE is a leading provider of internet security solutions purpose-built to protect businesses, solution providers, and home users from costly and malicious cyber threats. With over twenty years of industry expertise, VIPRE is one of the world's largest threat intelligence clouds, delivering protection against today's most aggressive online threats. Our award-winning portfolio includes comprehensive endpoint and email security, along with threat intelligence for real-time malware analysis. VIPRE delivers easy-to-use, comprehensive layered defence through cloud-based and server security, with mobile interfaces that enable instant threat response.

FOR MORE INFORMATION, visit global.VIPRE.com
call +44 (0) 800 093 2580 or send email to uksales@VIPRE.com.

ENDPOINT SECURITY CLOUD

- Top-ranked device protection for desktops, laptops, and servers
- File, network, and application level protection with DNS filtering
- Machine learning, real-time behavioural analysis, and a threat intelligence network

WEB ACCESS CONTROL

- Internet access controls block unproductive and unsafe websites
- Granular policy-based control

EMAIL CLOUD WITH ADVANCED THREAT PROTECTION

- Protection from known and emerging email-based threats including phishing and attachment protection
- Defends against viruses, malware, spam, bulk mail, phishing, and spoofing with six layers of scanning
- Ransomware and Business Email Compromise protection (BEC)

EMAIL ENCRYPTION

- Secure encryption of email sent to any recipient
- Secure web portal for any recipient that does not have end-to-end email encryption

SECURITY AWARENESS TRAINING

- Train employees to be alert and aware of online threats
- Email simulations of the latest phishing and BEC scams
- Periodic testing to measure employee knowledge

ENCRYPT.TEAM

- Private endpoints for zero-trust access to resources
- Cloud-hosted business VPN and ZTNA solution protects users working remotely or on-the-go
- Easily manage and scale
- Private endpoints for dedicated IP addresses

SAFESEND DLP

- Prevent misaddressed emails and loss of sensitive or proprietary information
- Detect keywords, data patterns or attachments such as credit card numbers, bank account details and national insurance numbers inside the email body
- Confirm external recipients and attachments in outgoing emails
