

VIPRE Core Defence Security Solution

The cybersecurity foundation required to defend your organisation from evolving threats.

IN 2020, NEARLY 45% OF ALL DATA BREACHES WERE CAUSED BY HUMAN ERROR, more than a 10% increase on the year prior. That's because cyberattacks have evolved from mass distributions of malware to a combination of more sophisticated techniques. Social engineering, phishing, and business email compromise cause the majority of breaches, with employees being the primary targets. And zero-day threats can evade simplistic, signature-based

detection. Today's SMBs need to secure the backbone of their organisation their data, devices, and people— all without breaking the bank.

Effective protection begins with VIPRE Core Defence, a fully-featured suite combining the foundational elements every security programme should start with in one simplified solution.

CORE DEFENCE SERVICES:

Endpoint Security Cloud

Best-in-class endpoint protection powered by machine learning and real-time behavioural analysis—to stop viruses and ransomware in their tracks

Web Access Control

Content filtering restricts access to resource-wasting websites and inappropriate media with granular settings for users and groups

Security Awareness Training

Education to enhance your employees' security posture when faced with evolving cyberthreats such as phishing or business e-mail compromise

Encrypt.team

Cloud-hosted business-class VPN and ZTNA solution to ensure your organisation's remote workforce stays secure whether working from home or on-the-go

years of malware protection and cybersecurity

endpoints protected and 12M+ mailboxes protected

customers and more than 3000 active channel partners

KEY BUSINESS BENEFITS

- Slash device and employee downtime due to ransomware and phishing attacks on servers and workstations
- ✓ Build a smarter, safer workforce prepared to recognise cyberattacks
- ✓ Protect sensitive data from prying eyes while employees work remotely
- Enforce acceptable-use policies to reduce inefficiencies, complaints, and legal liabilities

As your company grows, managing a multitude of endpoint security solutions can become daunting—simplify your solution and provide truly effective protection with **VIPRE Core Defence.**

"WE'VE SAVED A SIGNIFICANT AMOUNT OF TIME ON MANAGEMENT TASKS AND POLICY CONFIGURATION. AND VIPRE'S EASE OF USE ALLOWS OUR ENTIRE TEAM TO BETTER UNDERSTAND, UTILISE AND SUPPORT THE PRODUCT."

ENDPOINT SECURITY CLOUD

- Top-ranked protection for desktops, laptops, and servers
- File, network, and application-level protection with easily deployed DNS filtering
- Underpinned by our machine learning and real-time behavioural analysis engine as well as our threat intelligence network drawing upon over 20 years of malware samples

WEB ACCESS CONTROL

- Internet access controls block inappropriate websites and guard bandwidth usage
- · Granular policy-based control

SECURITY AWARENESS TRAINING

- Train employees to be alert and aware of online threats
- Email simulations of the latest phishing and BEC scams
- Regular testing to measure employee knowledge and learning progress

ENCRYPT.TEAM

- Private endpoints for zero-trust access to resources
- Cloud-hosted business VPN and ZTNA solution protects employees working remotely or onthe-go
