

Powerful Protection for Your Company

EMAIL IS THE LEADING CAUSE OF SE-CURITY THREATS to businesses. From malicious attacks, such as spam, phishing, and spoofing, to misaddressed recipients or employee error, email can be an omnipresent threat to any and every business.

That's why VIPRE Security has created VIPRE Edge Defence. Capable of blocking most malicious email attacks—even

advanced zero-day threats—Edge Defense provides world-class training through simulated scenarios to help your employees recognise phishing and other assaults. And with customisable rules for outbound email, you can ensure that sensitive information doesn't fall into the wrong hands.

EDGE DEFENCE SERVICES:

Email Advanced Threat Protection

Defend employees against the newest, most sophisticated strains of malware, weaponised attachments, and phishing techniques that evade traditional detection

Email Encryption

Send email safely, and without risk of snooping, to any recipient with full endto-end email encryption

Security Awareness Training

Education to enhance your employees' security posture when faced with evolving cyberthreats, 85% of which result from phishing and business e-mail compromise

SafeSend DLP

Prevent misaddressed emails and reduce employee error by scanning and confirming external recipients and email attachments in Microsoft Outlook

VIPRE IN NUMBERS

20+

years of malware protection and cybersecurity

endpoints protected and 12M+ mailboxes protected

customers and more than 3000 active channel partners

KEY BUSINESS BENEFITS

- Reduce business-threatening downtime due to malware, phishing, and spam attacks via email
- Benefit from always-on email continuity in case of planned or unexpected server downtime
- Use our 20+ years of machine learning and behavioural analysis experience to improve your threat detection for malicious email content
- ✓ Build a smarter, safer workforce prepared to recognise cyberattacks
- Protect your organisation's sensitive data by encrypting, scanning and validating email recipients
- ✓ Reduce accidental data loss through misaddressed email mistakes and utilise our powerful DLP engine to scan for sensitive content in emails before they leave your users' inboxes

As your company grows, managing a multitude of security solutions can become daunting—simplify your security stack and provide truly effective protection with **VIPRE Edge Defence.**

"VIPRE HAS DONE EVERYTHING THAT WE HAVE NEEDED IT TO
DO. WE HAVE BEEN ABLE TO CREATE OUR CUSTOM RULES THAT
BLOCK OUR USERS OR EXTERNAL USERS FROM SENDING ANY
KIND OF SOCIAL SECURITY NUMBERS OR CREDIT CARD NUMBERS
THROUGH OUR MAIL SYSTEM. THIS WAS A BIG WIN FOR OUR
IT DEPARTMENT AND IT FILLS A MAJOR GAP IN OUR SECURITY
PLAN, ALONG WITH KEEPING OUR USERS SAFE."

Mike Ziegler

St. Mary's University of Minnesota

ABOUT VIPRE

VIPRE is a leading provider of internet security solutions purpose-built to protect businesses, solution providers, and home users from costly and malicious cyber threats. With over twenty years of industry expertise, VIPRE is one of the world's largest threat intelligence clouds, delivering protection against today's most aggressive online threats. Our award-winning portfolio includes comprehensive endpoint and email security, along with threat intelligence for real-time malware analysis. VIPRE delivers easy-to-use, comprehensive layered defence through cloud-based security, with mobile interfaces that enable instant threat response.

EMAIL SECURITY ADVANCED THREAT PROTECTION

- Protection from known and emerging emailbased threats including phishing and attachment protection
- Defends against viruses, malware, spam, bulk mail, phishing, and spoofing with six layers of scanning
- Ransomware and Business Email Compromise protection (BEC)

EMAIL ENCRYPTION

- Secure encryption of email sent to any recipient
- Secure web portal for any recipient that does not have end-to-end email encryption

SECURITY AWARENESS TRAINING

- Train employees to be alert and aware of online threats
- Email simulations of the latest phishing and BEC scams
- Regular testing to measure employee knowledge

SAFESEND DLP

- Prevent misaddressed emails and loss of sensitive or proprietary information via email
- Detect keywords, data patterns or attachments containing sensitive data such as credit card numbers, bank account details and national insurance numbers inside the email body
- Confirm external recipients and attachments in outgoing emails
