

DATASHEET | SECURITY AWARENESS TRAINING

VIPRE SECURITY AWARENESS TRAINING

Educate Effectively. Reinforce Often.

YEAR-ROUND SECURITY AWARENESS AND ENGAGEMENT.

VIPRE Security Awareness Training (SAT) is an out-of-the-box learning programme which allows resource-conscious organisations to deliver regular, highly effective security awareness training with little admin effort. Our programmes are pre-set and consist of regular courses, reinforcing 'micro-learning' modules and phishing simulations. Our SAT Enterprise programme uses the SAT Advanced pre-set learning path with the added benefit of full customisation and access to our full course catalogue including courses about GDPR, anti-harassment and HIPPA.

Each year, depending on your SAT package you get access to four-six full courses, six-twelve phishing simulations and six micro-learning modules. In this way we build continual reinforcement of key security principles into our year-round learning programme.

COURSES

Our content has been developed by adult learning specialists who have studied how to change behaviours through regular training and assessment. VIPRE SAT courses vary in duration from full 30 minute, interactive training videos, to one-minute micro-learning modules designed to reinforce key security principles. Throughout the programme learners will receive comprehensive training on modern security essentials, avoiding phishing and spear phishing scams, staying secure on email and instant messaging, how to defend against ransomware as well as password management and the importance of physical security.

PHISHING SIMULATIONS

As well as access to our multi-award-winning content, VIPRE SAT also includes access to customisable phishing penetration tests to help you find your weakest links and discover your organisation's vulnerability level. Our phishing simulations give you real-time reporting by user, allowing you to enrol weaker users in more training to help them improve. You can choose from our pre-designed templates or design your own to make them even more relevant to your users.

THE LEARNING PATH

Many businesses view Security Awareness Training as a "once a year compliance tick box exercise" and don't consider the powerful role their employees could play in the protection of their data and network. While deploying a once a year security awareness training programme may satisfy compliance requirements, unfortunately it does not equate to a strong cyber defence strategy.

Our learning paths have been created to ensure your users are always alert to threats. Using a combination of engaging content and ongoing, drip-fed courses interspersed with phishing simulations, we ensure that your employees retain what they learn for longer, leading to better security outcomes for your business.

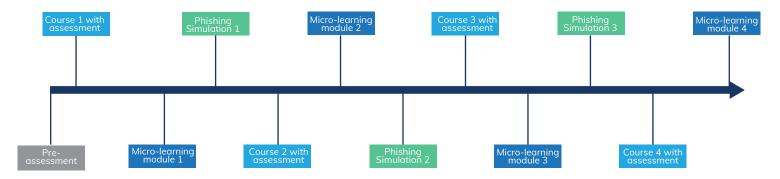

Fig. 1 Example SAT learning path with continual reinforcement of security principles and in-built phishing penetration testing.

YEAR ONE COURSE OVERVIEW

COURSE NAME	COURSE TYPE	SAT ESSENTIALS	SAT ADVANCED & ENTERPRISE	
CyQ Assessment	Initial benchmark assessment	✓	✓	
Security Awareness Essentials	Course	\checkmark	✓	
Phishing Simulation				
Defending Against Phishers	Course	x	✓	
Phishing Defense Best Practices	Micro-Learning	\checkmark	✓	
Email & Instant Messaging Security	Course	x	✓	
Phishing Simulation				
Protecting Against Spear Phishers	Micro-Learning	x	✓	
Ransomware How to Defend Yourself	Course	\checkmark	✓	
Phishing Simulation				
The Business Email Compromise	Micro-Learning	х	✓	
Physical Security	Course	\checkmark	✓	
Phishing Simulation				
Defending Against Ransomware	Micro-Learning	✓	✓	
Password Management	Course	x	✓	
Phishing Simulation				
Password Strong	Micro-Learning	x	✓	
Tales From CPU City™ - Tailgating	Course	х	✓	
Phishing Simulation				

Please note:

Our Advanced and Enterprise packages have unlimited phishing simulations.

We are constantly refreshing and adding to our course content to ensure our programme is up to date and relevant to the current threat landscape, therefore these courses are subject to change at any point.

YEAR TWO COURSE OVERVIEW

SAT ESSENTIALS

COURSE NAME	COURSE TYPE
CyQ Assessment 2	Benchmark assessment
	Phishing Simulation
Security Awareness Basics	Course
	Phishing Simulation
Protecting Against Spear Phishers	Micro-Learning
	Phishing Simulation
Password Management	Course
	Phishing Simulation
Defeating Social Engineers	Course
	Phishing Simulation
Protecting Mobile Data and Devices	Micro-Learning
	Phishing Simulation
Password Strong	Micro-Learning

SAT ADVANCED AND ENTERPRISE

COURSE NAME	COURSE TYPE
CyQ Assessment 2	Benchmark assessment
	Phishing Simulation
Security Awareness - Strongest Link	Course
	Phishing Simulation
Password Management	Course
	Phishing Simulation
SMiShed!	Micro-Learning
	Phishing Simulation
Protecting Mobile Data and Devices	Course
	Phishing Simulation
Living Mobile Secure	Micro-Learning
	Phishing Simulation
Defeating Social Engineers	Course
	Phishing Simulation
How to Defeat Social Engineers	Micro-Learning
	Phishing Simulation
Working Securely From Home	Course
	Phishing Simulation
The In-Personator - A Social Engineering Threat	Micro-Learning
	Phishing Simulation
Appropriate Use of Social Media	Course
Before You Post	Micro-Learning
	Phishing Simulation
The Fake App Trap	Micro-Learning

Please note:

Our Advanced and Enterprise packages have unlimited phishing simulations.

We are constantly refreshing and adding to our course content to ensure our programme is up to date and relevant to the current threat landscape, therefore these courses are subject to change at any point.

ANNUAL PACKAGE OVERVIEW

SAT ESSENTIALS

- 1 x CyQ Initial Assessment
- 4 x SAT Courses
- 2 x Micro-Learning Modules
- 6 x Phishing Simulations

SAT ADVANCED

- 1 x CyQ Initial Assessment
- 7 x SAT Courses
- 5 x Micro-Learning Modules
- **Unlimited Phishing Simulations**
- 1 x SMSishing Simulation
- 1 x Vishing Simulation
- Unlimited USB Baiting

SAT ENTERPRISE

- 1 x CyQ Initial Assessment
- $\label{eq:Access} \mbox{Access to the Full SAT Training}$
- Course Catalogue
- Access to all Micro-Learning Modules
- **Unlimited Phishing Simulations**
- 3 x SMSishing Simulation
- 3 x Vishing Simulation
- **Unlimited USB Baiting**

YOU MAY ALSO BE INTERESTED IN

You can now choose to add any of the below training packs to your Security Awareness Training packages. Ask your VIPRE representative for details

- Training for GDPR
- Training for Human Resources
- Training for Roles
- Training for Privacy

- Training for Harassment Prevention
- Training for PCI
- Training for HIPPA

Switch your users from IT risks to IT assets with our year-round learning programmes.
