

## The Powerful, Fast & Secure Email Archiving Solution

**VIPRE Email Archiving is a focused email archiving tool that can be tailored to match multiple business purposes and functions.**

We capture and store every message received by an organization in our highly scalable, highly available, redundant and geographically separated cloud infrastructure. Highly secure and audited access means that information can't be altered. With a complete focus on email archiving backed by unmatched expertise, VIPRE Email Archiving is designed to meet compliance needs, improve productivity and enable users, with fast search and retrieval of information when it's needed most.

### Saves time and money

- Searches millions of emails across multiple years (potentially terabytes of data) in seconds. Saving employees and IT staff hours of time over the year allowing them to get on with their day jobs.
- Reduces the time, cost and effort of e-discovery for investigation, litigation and routine SAR (Subject Access Requests).
- Removes the need to involve the IT department when searching for lost email.
- Reduces server management and storage costs.

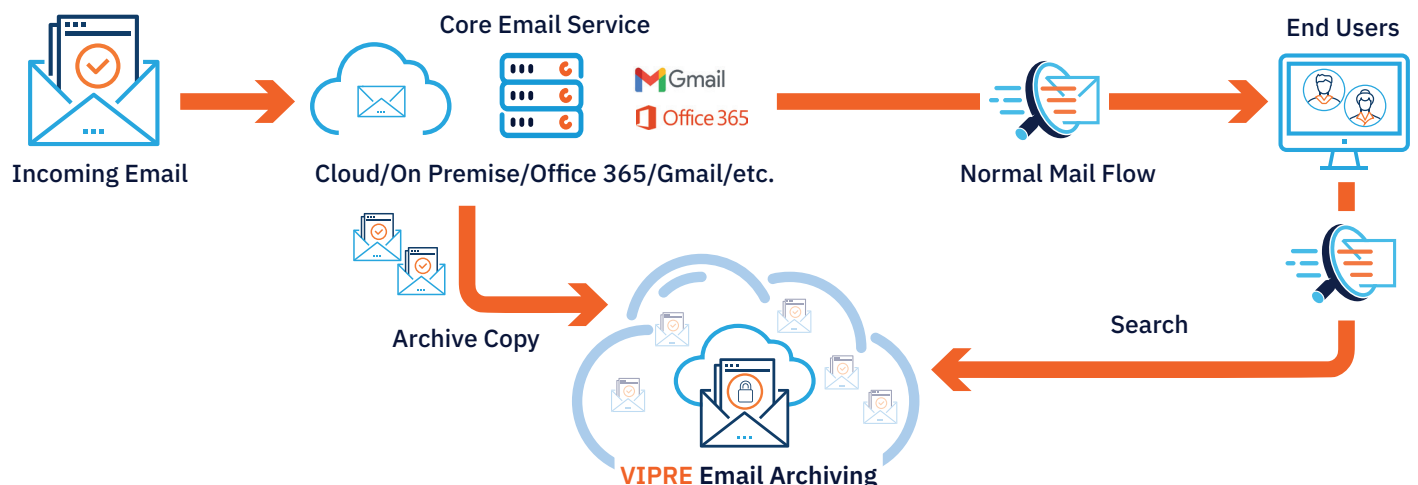

- Streamlined data import process - enables efficient onboarding of external sources of archived or stored data.
- Ensures quicker deployment - what could have taken months to deploy can be complete in a matter of days.

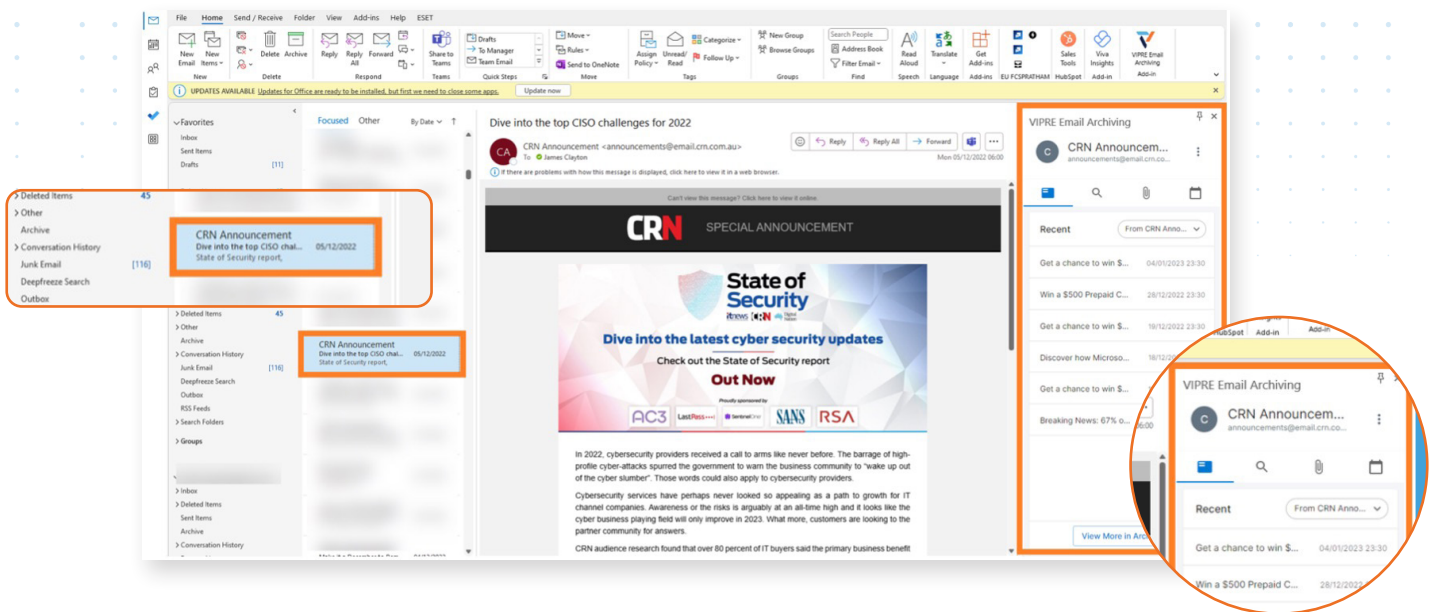

### Keeps you compliant

- Ensures that all email is retained in a compliant format that satisfies the broadest range of regulatory requirements.
- Customizable retention periods are available to meet your business needs, so you only keep the data you need to.
- Maintains a verifiable audit trail.
- Facilitates policy-based access rights and role-based access.
- Tamper proof store of data ensuring that no one can edit original emails.

### Helps you find your email

- Empowers end users with intuitive, super-fast search. Screens stopping them from having to wait minutes for searches.
- Seamless integration with Outlook.
- Combines searches for more accurate and refined results.
- Replicates your Outlook email folders within the VIPRE Email Archiving interface.
- Accesses emails easily on your mobile device, allowing for easier remote working for both employees and admin staff alike.

The number of emails sent and received per day is set to rise from

**290 billion in 2019 to almost 350 billion in 2025**

- **60% of all business critical information is stored only in email.**
- **74% of organisations have been ordered to produce employee email as part of legal action.**
- **32% of organisations have no policies in place to prevent employees from deleting important content.**
- **GDPR, FCA, SEC and Sarbanes-Oxley all have policies around data retention.**

### VIPRE Email Archiving Benefits

- Protect business-critical information stored in historic email.
- Respond to requests to produce employee email as part of legal action.
- Prevent employees from deleting important content.
- Make savings on core email services.
- Demonstrate compliance when conforming to regulatory requirements.
- Business continuity. Maintain email access at all times.

### Departmental Benefits

Our technology makes life easier for HR; meets the needs of both legal and compliance; supports IT with all email related tasks; and has been welcomed by financial departments across multiple industries as a valuable cost reduction.

Not only that, but the more departments that begin to use VIPRE Email Archiving, the more people benefit from real cost and time savings by bringing an improvement in efficiency.

## IT Department

- Deduplication and compression of email means less storage used, shrinking average storage size by a factor of 3.
- Reduced end user help requests gives IT more chance to be proactive in their role.
- No more PST files means no more PST management issues, mitigating IT worries and burden.
- No more IT involvement in HR investigations - granular rules and permissions mean that IT can ensure all users have the correct level of access they require.
- Improved disaster recovery, reducing the risk of having all your data in one place and getting your business up and running quicker.
- Assists migration between mail servers or to Microsoft 365.
- No more installation requirements and time consuming maintenance with a complete managed service.

## Human Resources

- Makes eDiscovery fast and easy.
- No longer need to wait for help with email investigations.
- Helps your business be compliant with privacy laws, with bottomless mailboxes ensuring important emails are kept ready to be called upon.
- Accountability auditing prevents unfair searches or snooping and therefore ensures compliance with privacy laws.

## Marketing, financial & compliance

- Validate records by attaching a digital finger print to them.
- Makes exporting email lists easy and super-fast.
- Allows access to external auditors where appropriate and recognizes cost savings.

## VIPRE Email Archiving Features

- Automated ingestion with sorting and deduplication
- Ediscovery
- Combined searches
- Outlook integration
- Role based access
- Single sign on
- Saved Searches
